## OPIOID USE DISORDER – TREATMENT

Opioid use disorder treatment options encompass a variety of approaches tailored to meet the unique needs of individuals seeking recovery. Medication-assisted treatment (MAT) combines FDA-approved medications like methadone, buprenorphine, or naltrexone with counseling and behavioral therapies. Inpatient treatment, also known as residential treatment, involves a stay at a specialized facility where individuals receive intensive care, including detoxification, medical monitoring, counseling, and therapeutic activities. Outpatient services offer flexibility by allowing individuals to live at home while attending regular treatment sessions, which may include counseling, group therapy, medication management, and ongoing support.

### MEDICATION-ASSISTED TREATMENT (MAT)

#### **Dr. Andy's Family Practice**

Phone Number: (870)-269-7777

1809 Ozarka College Dr.

Mountain View, Arkansas, 72560

Email Address/Website: <https://caiinc.org>

106 Mountain Place Drive

Mountain View, Arkansas, 72560

Services Provided: Intensive outpatient treatment for those who need it and are accepted for it.

## OPIOID USE DISORDER – RECOVERY

Recovery support services play a crucial role in helping individuals navigate the challenges of opioid use disorder and achieve long-term recovery. These services often include counseling, therapy, and group and peer support programs that address physical, emotional, and social aspects of recovery. Recovery support services provide a continuum of care, offering assistance at various stages of the recovery journey. They help individuals build a strong support network, develop coping skills, and access resources such as medication-assisted treatment, housing assistance, and employment support to enhance their chances of sustained recovery.

### RECOVERY MUTUAL SUPPORT GROUPS
