OPIOID USE DISORDER, TREATMENT

Opioid use disorder treatment options encompass a variety of approaches tailored to meet the unique needs of individuals seeking recovery. Medication-assisted treatment (MAT) combines FDA-approved medications like methadone, buprenorphine, or naltrexone with counseling and behavioral therapies. Inpatient treatment, also known as residential treatment, involves a stay at a specialized facility where individuals receive intensive care, including detoxification, medical monitoring, counseling, and therapeutic activities. Outpatient services offer flexibility by allowing individuals to live at home while attending regular treatment sessions, which may
